Published bi-monthly

*Microform Subscriptions and Back Issues*

Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche. Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

*Annual Subscription Rates 1979*

For libraries, university departments, government laboratories, industrial and other multiple reader institutions US \$90.00 per annum (including postage and insurance).

*Specially Reduced Rates to Individuals*

In the interests of maximizing the dissemination of the research results published in this important international journal we have established a two-tier price structure. Any individual whose institution takes out a library subscription, may purchase a second or additional subscriptions for their personal use at the much reduced rate of US \$30 per annum.

All subscription enquiries should be addressed to: *Subscriptions Fulfilment Manager, Pergamon Press Limited, Headington Hill Hall, Oxford OX3 0BW.*

Volume 10 Number 1

January 1978

- |  |    |   |
|--|----|---|
| M. Habte and M. Alexander                            | 1  | Mechanisms of persistence of low numbers of bacteria preyed upon by protozoa  |
| V.-L. Torsvik and J. Goksøyr                         | 7  | Determination of bacterial DNA in soil  |
| K. M. Goh, D. C. Edmeades and B. W. Robinson         | 13 | Field measurements of symbiotic nitrogen fixation in an established pasture using acetylene reduction and a [ <sup>15</sup> N] method |
| Y. Komatsu, M. Takagi and M. Yamaguchi               | 21 | Participation of iron in denitrification in waterlogged soil  |
| S. K. Pancholy                                       | 27 | Formation of carcinogenic nitrosamines in soils   |
| C. Theodorou   | 33 | Soil moisture and the mycorrhizal association of <i>Pinus radiata</i> D. don  |
| B. Ceccanti, P. Nannipieri, S. Cervelli and P. Sequi | 39 | Fractionation of humus-urease complexes   |
| A. Csinos and J. W. Hendrix                          | 47 | <i>Phytophthora</i> species producing toxin active on tobacco   |
| J. Dighton   | 53 | <i>In vitro</i> experiments simulating the possible fates of aphid honeydew sugars in soil  |
| W. A. Dick and M. A. Tabatabai                       | 59 | Inorganic pyrophosphatase activity of soils   |
| M. G. Hale   | 67 | Calcium concentration and the exudation of sugars from pegs and fruits of axenic peanut plants  |
| I. Watanabe  | 71 | Pentachlorophenol (PCP) decomposing activity of field soils treated annually with PCP   |

## Short Communications

- |  |    |   |
|--|----|---|
| J. M. Anderson                                   | 77 | A method to quantify soil-microhabitat complexity and its application to a study of soil animal species diversity |
| L. R. Mytton, N. J. McAdam and Patricia Portlock | 79 | Enzyme polymorphism as an aid to identification of <i>Rhizobium</i> strains                                       |
| J. E. Cooper                                     | 81 | A method for testing <i>Rhizobium</i> effectiveness at low pH   |
| N. C. Uren and G. W. Leeper                      | 85 | Microbial oxidation of divalent manganese   |

ENDEAVOUR is the vital link between scientific discovery and the application of new knowledge to industry, agriculture and medicine.

In three decades of publication, it has become one of the world's leading and most authoritative reviews of scientific and technological progress. Articles have been commissioned from all quarters of the globe and over 30 Nobel Laureates are included in the distinguished list of contributors.

Recognising the importance to mankind of the continual cross-fertilization of new scientific ideas with current industrial and commercial attitudes, ENDEAVOUR concentrates on topics that are equally relevant to both sides.

Its emphasis is primarily on subjects of global, social, political and economic consequence. Pollution, alternative energy developments, new scientific discoveries and the most significant biological and biochemical issues are covered.

Nobody with an interest in the implications of scientific progress for world development should be without ENDEAVOUR.
